PRAVEEN KUMAR

Mobile Application Developer (React Native / Android) | Aspiring SDE-1

Ghaziabad, UP, India | +91 7830469154 | praveenkumarlodhi001@gmail.com

linkedin.com/in/praveen-kumar-005489367 | github.com/praveenkumarlodhi001-create | Portfolio

Google Play: Roastify (TaporiGPT) | Google Play: Bol Khata

PROFESSIONAL SUMMARY

Final-year B.Tech (CSE) student and mobile-first software developer who has shipped two cross-platform React Native apps to Google Play — one in Open Testing, one in Closed Testing — and built the full stack behind them (Node.js, Express, MongoDB, Firebase). Comfortable across UI, authentication, offline-first data sync and Play Console release configuration. NPTEL Elite-certified in Core Java (IIT Kharagpur) and Machine Learning (IIT Madras). Builds solo, ships working software, and turns ideas into functioning products quickly.

TECHNICAL SKILLS

Languages	Java · JavaScript (ES6+) · Python · C/C++ · SQL
Mobile	Mobile App Development · React Native · Expo · Android Development · Cross-platform UI · Performance Optimization
Backend	Backend Development · API Development · REST APIs · Node.js · Express.js · MongoDB · Firebase · Authentication (JWT / OTP)
Core CS	Data Structures and Algorithms (DSA) · Object-Oriented Programming (OOP) · Multithreading · Operating Systems · Computer Networks · DBMS · Machine Learning Fundamentals
Practices	Debugging · Problem-solving · Code Optimization · Version Control · Git · GitHub · Rapid Prototyping · Google Play Console · Android Studio · Postman
Profiles	LeetCode · HackerRank — 5★ Gold (Java), 4★ (Python) · GeeksforGeeks

PROJECTS (SOLO BUILDS)

Roastify (TaporiGPT) — AI Persona Mobile Application *Live on Google Play (Open Testing) | Jul 2026 – Present*

React Native · Firebase Auth · Cloud Firestore

- Independently architected the app, generated release keystores, and deployed it end-to-end to the Google Play Store via Google Play Console.
- Engineered client-side routing logic for five distinct AI personas (Tapori, Roast, Gamer, Love, Shayar) with low-latency response handling.
- Profiled and optimized React Native component lifecycles to sustain smooth 60 FPS UI animation on entry-level Android devices.

Bol Khata — Voice-First Merchant Ledger *On Google Play (Closed Testing) | In Active Development*

React Native (Expo) · Node.js · Express · MongoDB · JWT/OTP Auth · Render

- Built a full-stack udhar/ledger app for local shopkeepers: React Native (Expo) client with a Node.js/Express + MongoDB backend deployed on Render, secured with OTP and JWT authentication.
- Designed an offline-first outbox so transactions recorded without network sync to the server once connectivity returns; added Seller/Buyer modes and an items catalog.
- Added voice-based entry in Hindi/Hinglish so shopkeepers can log amount, party and credit/debit by speaking instead of typing; released to Google Play Closed Testing (join as tester).

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering — Dr. A.P.J. Abdul Kalam Technical University (AKTU) *Expected Graduation: 2027*

- CGPA: 7.76/10 (through 3rd year, 6 semesters). Coursework: Data Structures & Algorithms, OOP (Java/C++), DBMS, Operating Systems, Computer Networks.

CERTIFICATIONS

- **Programming in Java (Elite)** — NPTEL, IIT Kharagpur | Jan–Apr 2025
- **Introduction to Machine Learning (Elite)** — NPTEL, IIT Madras | Jul–Oct 2025
- **Machine Learning with AI (Top Performer)** — Internshala Trainings, IITM Pravartak Technologies Foundation | 2025
